Subject Index

accuracy-motivation, 148
action, definition of, 2
actual self, 9
  and shared reality, 19–22
actual/Ideal discrepancies, 6, 24
actual/Ought discrepancies, 6
administrative diagnosis, 243
adolescents, relationships, 17
affective states, 64–88
  mood-and-general-knowledge assumption, 85
  processing capacity, 86
  processing motivation, 86
  and social judgment, 88
agitation-related emotions, prevention focus, 23
AIDS prevention, 258
  programmes, 248, 266–70, 275–7
  see also HIV
alienation, 19–20, 24
allocators, in task-sharing, 39
analysis, levels of, 128–35
  intra-individual, 129–30
  positional, 132–4
  situational, 130–2
  societal beliefs/representations, 134–5
anxiety, 52, 122
applied social psychology
  problem-driven, 245–50
  theory-driven, 245
approach system, definition of, 8
approach/avoidance conflict, 18
argument(s), 176
  exchange, 176–7
  integration, 194, 196
  overlap, 176, 197
  pool of, 175
  quality, 69
  retrieved, 198
assimilation
  self/others, 118–20
  stereotypes, 97
asymmetrical dependencies, 45
attitude, 252, 253
  differential influence, 149–54
  expression, 183, 193
  polarization, 177, 181, 191, 193, 194, 198
  rehearsal, 183–4
attitude change, 155, 162
  convergent processing, 160–4
  systematic processing, 156
attitude extremity, 175, 176
  repeated expression, 183–8
attitude-relevant behaviours, 187
attitude research
  majority influence, 153–4
  minority influence, 153–4
attitude/social influence/self-efficacy model, 254
attribution theory, 247, 249
attributors, 33
authoritarian personality, 64
autobiographical memory, 6
autonomy, 32
avoidance system, definition of, 8

bandwagon effect explanation, 177
basic investment game, 217–18, 220
  incentives, 221
behaviour change, communication, 260–1
behavioural determinants
  protocol for, 253–4
  theories of, 251–3
behavioural diagnosis, 243
beliefs, power control, 55
bias, outcome expectations, 51–3
bilateral negotiation, Heuristic-Systematic Model, 147
biographical memory, 6
bolstering, 4

capacity, processing, 71
capacity constraints, mood-and-general-knowledge assumption, 84
categorical information, 73
  happy individuals, 83–7
  peripheral cue, 79
  person perception, 66–7
  relative impact of, 75–83
  timing, 80–3
categorization, 73, 96
  peripheral cue, 82
  and social identity, 126–8
causal attribution, 247–9
cheerfulness-related emotions, 13
  promotion focus, 23
child/caretaker interactions, 2
children's interactions, significant others, 23
choice dilemmas, 174, 175
choice justification, efficacy as, 220–2
chronic regulatory focus, 6–8
  emotional sensitivity, 12–14
  strategic inclinations, 8–12
cognitive ability, 159
  Heuristic-Systematic Model, 148
cognitive approaches, intragroup variability, 109–16
cognitive differentiation, 125
  stereotypes, 97
cognitive factors, intragroup variability, 123–8
cognitive processes, 136
  intragroup variability, 130
cognitive resources
  happy mood subjects, 77
  reducing, 156–8
cognitive stereotypicality, 97
collective ..., *see also* social ...
collective action, and control deprivation, 56
collective efficacy, 213, 217, 218, 219
collective interest, 209
collective performance, 211
collective welfare, 227
collectivist cultures, 135
colour perception studies, minority influence, 152–3
communication
  behaviour change, 260–1
  persuasive, 69
competition
  interpersonal, 45
  intragroup variability, 130
computation, 188–90
concentration abilities, 46
concept-related strategy, 250
conceptual preliminaries, 211–13
conflict, approach/avoidance, 18
Conflict Elaboration Theory, 158
conformity, 146, 255
consensus, false, 155
'consensus implies correctness', 149, 157
  Heuristic-Systematic Model, 148, 149
continuation, definition of, 271
contrast, stereotypes, 97
control deprivation, 33, 42, 43, 56
  and group power, 47
control feelings, and social identification, 56
control motivation, 32
control needs, 32–4
convergence–divergence perspective, 161
convergent processing, 162
  and attitude change, 160–4
convergent thinking, 146, 163
  definition of, 159
convergent–divergent perspective, 159–60
conversational norms, 188, 191
conversational simplification, 186
Conversion Theory, 146, 149, 164, 167
  attitude change, 153–4
  colour perception studies, 153
  minority influence, 152–3, 157–8
  systematic processing, 155
cooperate/defect choices, 230
cooperation, 228, 234

efficacy of, 210–13, 213–15
group discussion, 230
overall rate of, 218
perception of inefficacy, 234
self-efficacy of, 215
social dilemmas, 212, 222–5
cooperation-contingent incentives, 227
cooperation-contingent remedies, 227, 228, 235
correspondence bias, 223

decision making, and power, 54
defence mechanisms, 64
defence-motivation, 148
dejection-related emotions, promotion focus, 23
dependency
asymmetrical, 45
control deprivation, 42
diagnostic information, 50
social control, absence of, 41–6
dichotomous judgments, 184
differential influence
attitudes, 149–54
perceptions, 149–54
systematic processing, 154–8
differentiation
intergroup, 136
self/others, 118–20
diffusion theory, 271
dilemmas, difficulty of, 219
DIS, *see* dispersion
discrepancies, 6
amplifying system, 9
reducing system, 9
discriminatory behaviours, 120–1
dispersion (DIS)
intragroup variability, 99, 108
measures of, 99–100
dissemination, definition of, 271
distinctiveness, 119
distinguishing characteristics, 125
distribution, 99
divergent thinking, definition of, 159
Dominance by Information-Type interaction, 38
dual-role interpretation, 165–6

educational diagnosis, 243, 251
educational methodologies, 263
efficacy
choice justification, 220–2
and cooperation, 210–15
expectations, 212
illusions of, 234
judgements, 223
moderating variable, 225–33
perceptions of, 210, 215–22
social dilemmas, 222–5
egocentric social categorization, 125–6
Elaboration Likelihood Model (ELM), 147, 261
emotion(s), 13, 247
powerlessness, 52
stability in, 20
emotional sensitivity
chronic regulatory focus, 12–14
temporary regulatory focus, 14–15
enabling factors, 244
enactive learning, 261
end-states, 9
environmental diagnosis, 243
environments, control in, 33
epidemiological diagnosis, 243
epidemiological theories, 251
ethnicity, 37
evaluation, 52, 78, 87
intragroup variability, 109
evaluation mode, 160
executors, task-sharing, 39
exemplars, groups, 110
expectancy-inconsistent information, 43
expression, 188–90
frequency of, 184
extremity, repeated expression, 188–90

false consensus, 155
familiarity, 132
favour/oppose judgments, 184
feedback, absence of, 194
final attitude rating, 186
focal change, 151
focal issues, 162, 164,
frequency histograms, 114
friends, importance of, 17
frustration-aggression hypothesis, 64

gender group, 111, 112
general issue thoughts, 161
general knowledge structures, 67, 83
global measures (GLO), 100
intragroup variability, 108

goal-oriented behaviour, 252
group(s), 46
  gender in, 111, 112
  heterogeneous entity, 96
  interaction factor, 232
  interaction manipulation, 231
  membership, salience of, 182
  outcome dependency, 44–6
  power, and individual power, 46–50
  prototypic position, 181, 200, 201
  relationships, minority/majority, 133
  self-categorization theory, 180
  status, and self-esteem, 48
  success, past, 218–20
  success/failure manipulation, 231
  variability, judgment of, 110
group discussion, 175, 182, 196, 226
  repeated attitude expression, 190–6
  risk taking, 174
  social dilemmas, 229–30, 235
group identification, 223, 231
  enhancements of, 231–4
  shared-fate in, 232
group norm, 146, 177, 179
  AIDS prevention, 266
  estimates of, 178
group polarization, 174, 175–202
  repeated expression, 183–202
group size, 214, 216–18
  illusions of efficacy, 234
  overgeneralization of, 222
  shared fate, 233
group-specific, norms, 179
guided encoding, 74

halo effects, 68
happy mood subjects, 76
  category information, 80, 83–7
  cognitive resources, 77
  mood-and-general-knowledge assumption, 85
  processing, 78
Health Belief Model (HBM), 248, 251
health education
  definition of, 242
  implementation of, 270–7
